

Wisconsin Public Utility Institute

R. William Provencher, UW-Madison

Bill Provencher is a Professor in Applied and Agricultural Economics at UW-Madison. His research focuses on environmental, resource, and energy economics. He is currently Director of a 1-year professional Master's program in Resource and Energy Demand Analysis at UW-Madison (REDA: <http://reda.aae.wisc.edu/>). He is also a Director at Navigant Consulting, focusing on the statistical estimation of the impacts of energy efficiency and demand response programs, including the impacts of residential real-time energy pricing programs, smart thermostat rebate programs, direct load control programs, and web-based behavioral incentive programs. Bill holds degrees from Cornell, Duke and UC-Davis.
