Dennis Winters, Wisconsin Department of Workforce Development

Dennis Winters is Chief Economist, Director of the Bureau of Workforce Information and Technical Support, and Labor Market Information Director for the Wisconsin Department of Workforce Development. He is a nationally recognized expert on human resource challenges in the competitive global economic environment. He has presented on the increasing value of talent to numerous audiences, including the Milken Global Conference, the Society of Business Editors and Writers, the National Association of State Legislators, and the Council of Chief State School Officers.

A graduate of UW Madison and Colorado State University, Dennis has been a consulting economist for over thirty years including senior positions at Wharton Econometric Forecasting Associates (WEFA), DRI / McGraw-Hill (now combined into IHS

Global Insights). He was Vice President and Director of Research for NorthStar Economics.

Dennis has expertise in economic analysis, modeling and forecasting, encompassing everything from designing commodity derivative strategies to long-term policy initiative scenario assessments. His areas of focus include regional and national macroeconomics, energy and labor markets, and economic impact analysis. He has served as an advisor to private industry, government agencies, and elected federal, state, and local officials.
