

Christopher Kuhl **Edison Energy Services/SoCore Energy**

As Director, Business Development – Energy Storage Solutions, Chris is leading the commercial efforts for Edison Energy Services/SoCore Energy to provide EPC turn-key and Develop/Own/Operate energy storage systems for Commercial, Utility and Electric Co-op customers across the Country. Working with the Energy Storage Solutions team, his efforts focus around providing value-add, cost-reduction or shared savings deployments of both behind-the-meter (BTM) and distribution connected, utility-scale projects. Additionally, he supports the product development and integration efforts for

energy storage on Edison Energy's emerging micro grid offerings for campus, commercial and industrial end-users. Chris brings over 20 years of battery and power system sales, global market development and product launch experience from various OEM's like Johnson Controls, Eaton Electrical and EnSync Energy to the organization. Chris earned his BA in Finance from the University of Wisconsin-Milwaukee in 1993 and his MBA also from UW-Milwaukee in 2009.
