## **Jacqueline DeRosa** **Customized Energy Solutions**

As Vice President of Emerging Technologies, Jacqueline assists her clients in evaluating and integrating emerging technologies in energy markets. She is an expert in the energy regulatory arena and wholesale market rules. She helps her clients with interconnection, pricing, contract evaluation, and understanding the requirements of participation in the wholesale market.

Jacquie has over 25 years of experience in the energy industry. Prior to joining CES in 2007, she worked for the California ISO in the market design and account management areas. She has also worked on international energy sector restructuring matters for the USAID and in project development for an independent

power producer. She began her career at the FERC. Jacquie has a B.A. from Rutgers University and an M.B.A. from George Washington University.
