

Michael J. Londo

American Transmission Company, LLC

Mike has been in the electric utility industry for approximately 29 years in a variety of operating and management positions. Currently he is the transmission reliability administrator with ATC. He is a “founding employee” of ATC and answered the very first ATC phone call during the company’s first moments of operation on January 1, 2001. Previously, Mike worked for Wisconsin Electric Power Company. While at Wisconsin Electric, Mike

was a classroom instructor as well as the senior electrical maintenance supervisor at the Point Beach Nuclear Plant.

Prior to his electrical industry career, Mike served 20 years in the U.S. Navy where he operated and maintained the nuclear power plants on board three different nuclear submarines. He holds NERC Transmission System Operator certification, including the highest certification, Reliability Administrator, since 1998. Mike was a system control operator from 2001-2002, an outage coordinator from 2002-2011, and has been transmission reliability administrator since 2011. Mike is a 1975 graduate of Little Chute High School in Little Chute, WI.
