

ADAM MANTY

ATC

Adam Manty has been with American Transmission Co. since 2008 and has held positions within both the System Operations and System Planning departments. Presently, Adam is a transmission planning engineer within the Interconnections and Special Studies group at ATC. Adam has served as a lead engineer on several recent important projects for ATC related to the use of new technologies, including the Mackinac HVDC and Benson Lake SVC projects as well as generation interconnection studies for new types of renewable energy.

Adam received his engineering education at Michigan Technological University and is a registered professional engineer in the state of Wisconsin as well as a NERC certified system operator.
