

TIM AMENT

WPPI Energy

Tim Ament’s background includes 23 years in the electric industry, with utility rates as his focus for the past two decades. He has extensive experience conducting and supervising the development of utility cost-of-service studies, rate impact studies and retail rate designs for electric utilities. Tim is currently director of rates at WPPI Energy, where he has served on the staff team for more than 18 years. His previous roles included working as a system operator at WPPI Energy and as a utility analyst and manager for regulatory affairs at the Anchorage Water & Wastewater Utility. Tim holds an A.S. in electrical power engineering technology from Mid-State Technical College and a B.S. in biology from University of Wisconsin—Stevens Point, with additional coursework in accounting at the University of Alaska-Anchorage.
