BEN VONDRA

State of Wisconsin

Ben Vondra works for the State of Wisconsin Department of Administration (DOA) as Wisconsin's Volkswagen (VW) Mitigation Program Administrator. In this role, Ben develops and implements programs funded by Wisconsin's \$67.1 million VW trust fund. The fund was created through a court settlement resulting from Volkswagen's federal Clean Air Act violations. The program's objective is to mitigate excess air pollution caused by emission control "defeat devices" installed on nearly 590,000 VW diesel engine vehicles. Prior to joining the Wisconsin DOA, Ben managed public transit grant programs at the Wisconsin Department of Transportation. He received an MS in urban and regional planning from the University of Wisconsin-Madison and a BS in land use management from the University of Wisconsin-Stevens Point.
