

TOM GUTTORMSON
Connexus Energy

Tom Guttormson is principal technology engineer for Connexus Energy, a Minnesota cooperative headquartered near Minneapolis. His current roll includes evaluation of technology applications and associated business case development for new grid automation technology and overseeing deployment of grid technology initiatives. Key recent work has included deployment of Volt/VAR control, AMI integration for dynamic voltage reduction, and technical lead for deployment of grid-scale solar and storage. Tom also has served as lead for distribution planning and all facets of distributed generation interconnections over his 31 years with Connexus. Tom has degree in electrical engineering from North Dakota State University and an MBA in technology management. He is a registered Professional Engineer in Minnesota.
