

**DEREK WAGNER**  
**Alliant Energy**

Derek Wagner is the manager of power quality and distribution generation engineering for Alliant Energy. In this role, Derek leads the technical interconnection requirements of distributed energy resources (DER) with the Alliant Energy distribution system. He is part of the engineering and customer solutions department focusing on researching and piloting new technologies and services. Prior to this position, Derek was a substation engineer designing distribution substations and a project engineer responsible for the design and construction of Alliant Energy's transmission connected wind projects. Derek holds a bachelor of science degree in electrical engineering from the University of Iowa.
