

AARON GRABER
ITC Holdings

Aaron Graber is the supervisor of design, records, and standards for ITC Holdings' overhead transmission line department. He has worked at ITC for 12 years, first in overhead line design, then in standards, and finally as a supervisor of those same departments. Aaron currently serves as ITC's engineering lead for climate change adaptation. Aaron is a licensed professional engineer in the state of Iowa and graduated from Iowa State University with a degree in civil engineering.
