

LAURA RAUCH

Midcontinent Independent System Operator (MISO)

Laura Rauch is senior director of transmission planning at MISO, where she has held multiple positions focusing on planning and market functions. Most recently, she was director of settlements and, prior to that, director of resource adequacy. Laura has worked with broad groups of stakeholders to determine operational and market solutions to support resource adequacy for the MISO region, in light of the changing resource mix. Previously, she managed NERC Transmission Planning compliance as well as the evaluation of transmission service and generator interconnection requests. She led efforts to support state and federal policies, including directing the business case for MISO's Multi Value Project portfolio to support state renewable mandates and leading the effort to ensure compliance with FERC Order 1000. Laura holds a bachelor's degree in electrical engineering from Michigan Technological University and an MBA from Indiana University.
