

ZACHARY ZIMMERMAN

Grid Strategies LLC

As the research and policy manager for Grid Strategies, Zach Zimmerman is focused on economic, policy, and regulatory analysis related to power markets and transmission systems. His work includes writing reports, drafting comments, and responding to government policy proposals for Grid Strategies clients as well as facilitating the Advancing Modern Powerlines (AMP) Coalition to support the deployment of high-performance conductors on the grid. He also supports the Working for Advanced Transmission Technologies (WATT) Coalition's policy and advocacy work. Zach previously worked as a committee legislative assistant for the Minnesota House of Representative's climate and energy finance and policy committee. Zach earned a bachelor's degree in biochemistry from Goshen College (Indiana) and a master of public policy from the University of California, Berkeley, Goldman School of Public Policy, where his thesis focused on transmission planning in the Pacific Northwest.
