

AMPARO NIETO **BRG**

Amparo Nieto is a director in BRG's energy and climate practice where she directs a membership-based utility working group focused on rate innovation and regulatory models. She has been published in the *Electricity Journal* and *Public Utilities Fortnightly* and is a frequent speaker at industry and academic energy forums. Amparo is an economist with over thirty years of experience as an expert witness in energy regulatory and litigation matters. She testifies before state utility commissions

and advises utility and commission staff on many energy-related topics across the US, Canada, Latin America, the Caribbean, Europe and Australia. She has also been cross-examined during energy litigation cases. She is a thought leader on innovative rate designs that support affordability, equity, and economic efficiency during the transition to a decarbonized energy sector. She has pioneered many utility marginal cost-of-service studies and time-differentiation methodologies and contributed to the design of wholesale energy and capacity market rules supporting independent system operators and energy regulatory commissions and evaluated the tariff systems and provided training to regulatory commissions. Before joining BRG, Amparo worked with Charles River Associates; PA consulting; was a senior director with E3, Energy and Environmental Economics; senior vice president with Economists Incorporated; and was a vice president with NERA Economic Consulting. She received a BA in economics from Universidad Carlos III de Madrid (Spain) and an MS in economics from the Institute for Fiscal Studies (London, England).
