

## **CYNTHIA CRANE**

### **Crane Energy Policy**

Cynthia Crane is the president of Crane Energy Policy, which provides expert MISO and FERC transmission policy analysis, understanding of the regulatory environment, and stakeholder advocacy to help clients achieve their goals. Her 30+ years of experience offers an in-depth understanding of the MISO and FERC transmission policy and regulation, regional transmission planning, generation

interconnection, cost allocation, rate design, and the stakeholder process along with relationship building, collaboration, and strong stakeholder advocacy. She served as the MISO planning advisory chair from 2017-2026. In that role, she strove to ensure stakeholder views were considered and to support resolution of their concerns and needs. Cynthia began her energy career at the Pacific Gas and Electric Company where she held roles in rate design, regulatory relations, governmental relations, generation interconnection, and electric transmission policy. She joined ITC Holdings in 2007 where she was the MISO regulatory strategy manager responsible for planning related transmission policy issues including state, federal, and RTO energy policy analysis and development as well as rates, tariffs, and pricing issues. She received a BA in political science from the University of Rochester (New York) and a master of public policy from the University of Michigan.
